Learning Path Builder

Plan a learning path people actually finish

1. Goal and audience

Goal: what learners will be able to do at the end

Audience, and what they already know

Target completion time (for example, 30 days)

2. Path steps

Keep each step 5-20 minutes. Put prerequisites first. Mix formats.

#	Step	Format	Time	Due	Check
1					
2					
3					
4					
5					
6					
7					
8					
9					
10					

3. Milestones

Milestone 1 (and how it is recognized: badge, certificate, sign-off)

Milestone 2

Final milestone

4. LMS setup checklist

- [ ] Path created with steps in order
- [ ] Prerequisites set
- [ ] Auto-assignment by role or start date
- [ ] Due dates and reminders on
- [ ] Certificate or badge at the end
- [ ] Manager can see progress
- [ ] Report to spot where people stall
- [ ] Review date after the first group
